

The Consultation

Author/Director: Hélène de Crécy

Producer: Arturo Mio

Country: France

Length: 91'

Through the daily life of a general practitioner, this film offers an investigation into today's medical practices - practices which have become so specialised and modernised that they sometimes bypass what was once their foundation: the doctor's appointment and clinical exam.

We attend the doctor's daily appointments and are put on equal footing with the standard words and gestures: there are as many people as there are pathologies, as many stories as there are pains, as many situations as there are issues.
